## Lips--by Dr. Lee

Before

After

Juvederm® & the new Juvederm® XC, (with 0.3 % lidocaine for numbing) are gel fillers made of hyaluronic sugar (something already in your body) usually injected into the wrinkles along the sides of the nose and the mouth. The results are immediate and dramatic, with a smooth, natural, & younger look.  
So What Makes It Better?

Juvederm injectable gel is produced using HYLACROSS® technology, resulting in a smooth consistency gel that gives a long-lasting, natural, look and feel. In June 2007, the FDA allowed Juvederm to announce that it lasts up to 12 months--perhaps twice as long as other hyaluronic gel fillers.

## Does It Hurt?

Clinically, Dr. Lee found Juvederm® Treatments to have minimal discomfort, especially after pre-treatment with our anesthetic numbing cream. Even better, Juvederm® XC(which costs just a little more) has 0.3 % lidocaine numbing incorporated right into it for maximum comfort during your treatment. Not surprisingly, more than 90% of our patients prefer Juvederm® XC. It is so smooth and effective, even lip treatments can be done without the need for dental blocks for adequate anesthesia.

## What Is A "Liquid Lift?"

This is the term which has become fashionable in the media to describe the increasing use of Botox and Aesthetic Fillers (such as Juvederm®) to give many of the cosmetic effects of a face-lift--without the extreme costs, risks, and downtime of traditional plastic surgery. This has become an increasingly attractive option for those who want to look their

best (in these harsh economic times), but who simply don't have the time for post-surgical recovery or who just don't want to look un-attractive for so long while in recovery. Of course, a "liquid lift" is not the equivalent of face-lift surgery, but as you can see, it is amazing what we can now do with this wonderful technology.

Dr. Lee was the Featured Physician Interviewed on TV's Popular Face to Face (with Jon Ralston and Dana Gentry) on Botox and Juvederm Cosmetic Trends for the State of Nevada in September of 2009.

- Garry R. Lee, M.D., is Credentialed by Allergan Medical Facial Aesthetics as a Physician Instructor and Program Speaker--one of only 6 Botox & Juvederm Clinical Instructors in Southern Nevada chosen from @ 200 Medical Practitioners.

- Allergan Ranked Dr. Lee as the #3/180 Juvederm Injector in the State of Nevada for Calendar Year 2009--even compared to practices with several cosmetic physicians--who were established years longer . . .

Dr. Lee was the Clinical Instructor of the 2-Hour Aesthetic Medicine Workshop of the Nevada Academy of Family Physicians CME Conference in August 2009, in Las Vegas.

Dr. Lee personally administers all cosmetic injections for Horizon Ridge Wellness Clinic patients, unlike many places who use only nurses or physician assistants to do these procedures, while Physicians only participate--as remote supervisors.

- Allergan selected Dr. Lee to participate in their JET Research Trial in 2007, to evaluate patient satisfaction and the results of Juvederm®; before it was commercially available to the public.

## What Our Juvederm®; Patients Say About Us . . .

- J. Christian. "I recommend liquid lifts anytime. Amazing results. Nice to look younger again. This could be habit forming."

- L. Hague. "I want to thank all of you for your valuable service. I feel so much better about myself. I feel more confident, more friendly. I talk to strangers everywhere I go. Thank you so much. You're the greatest Dr. Lee."

- A. Hollingsworth. "Thank you so much for providing me with the Juvederm treatment. It made a huge improvement in my appearance and I feel so much better about myself ..."

## Dr. Lee Instructing the 80 Physicians of the NAFP CME Meeting in 2009

Horizon Ridge Wellness Clinic Infection Control Policy: we use disposable single-use medical instruments; the protocols most USA physicians use for each product; and only new syringes and new needles--which are never re-cycled or shared. The Horizon Ridge Wellness Clinic has never found a single case of a communicable disease arising from treatment here.
